Pre – requisite:

1. JavaScript should be enabled in the browser.

Steps to be followed to enable JavaScript:

a. Click tools menu >> Internet Options.

b. Then select the Security tab. It will show the Security Settings window.

c. Select the enable radio button for Active Scripting, Allow paste operations via script and Scripting of Java applets. It will prompt a dialog box asking 'Are you sure you want to change the security settings for this zone?' Click Yes.

d. Then select the Advanced tab. In the Browsing option check the options:

- Disable Script Debugging (Internet Explorer).
- Disable Script Debugging (Other).
- Display a notification about every script error.

Then click ok.

2. It is best viewed on Internet Explorer 6.0 and above.

Purpose:

This document specifies requirements for the customisation of IISFM Software for Madhya Pradesh State Civil Supplies Corporation (MPSCSC) and State Warehouse Corporation.

The Main objective is to interlink state level agency like MPSCSC & SWC with FCI, to get clear & fair picture in terms of PDS. Secondly it will also help state level agency to provide information on food grain storage and distribution in the State.

The requirements analysis contained in this document defines the specific functionality that must be met in order to successfully deploy a system. The requirements of the user have been translated into measurable and definable business rules and functions to allow for successful development of a comprehensive process tracking system.

The intended audience for this document includes technical professionals from NIC involved in the design, coding and testing of the system as well as management of MPSCSC and (issue centre) SWC.

Scope:

The software to be produced from these requirements is a customized Depot Module and reports. The objective the client wants to achieve in acquiring a new system is to reduce time spent to track and process records by hand. Specifically, the new system must achieve the following goals:

Provide timely and accurate information to management

Provide greater reporting capability

Be easy to use and learn

Be reliable and require little maintenance

The monitoring system should be able to generate reports in all desired format and assist in various decision-making requirements of the organization.

Definitions, acronyms, and abbreviations:

SRS: Software Requirements Specification (this document)

NIC: National Informatics center

IISFM: Integrated Information system for Food grain Management

MPSCSC : Madhya Pradesh State Civil Supplies Corporation

SWC: State Warehouse Co-oporation

UC: USE CASES

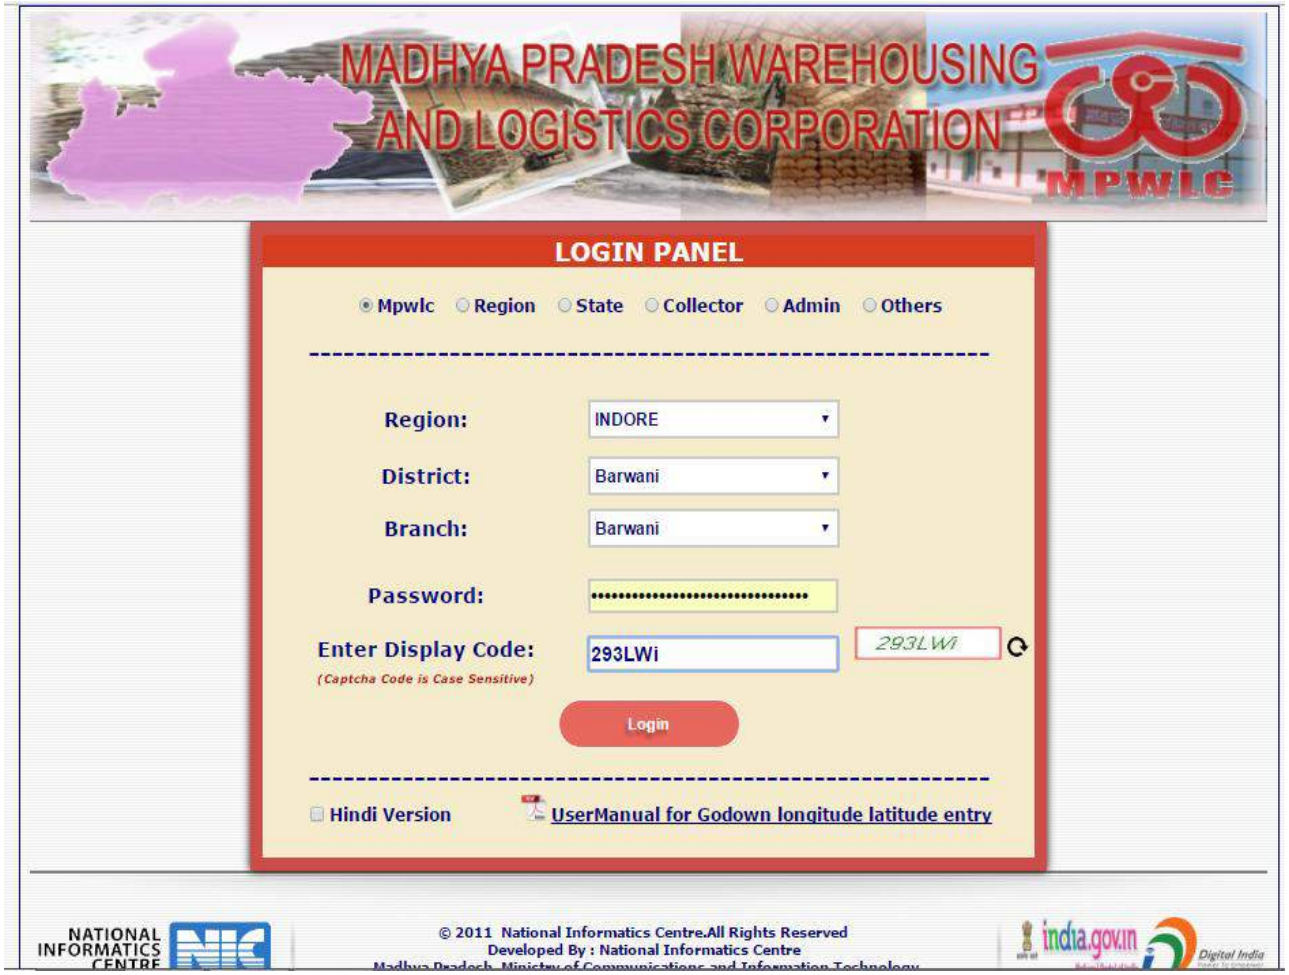
WHR: Ware House Receipt

WCM: Weight cash memo

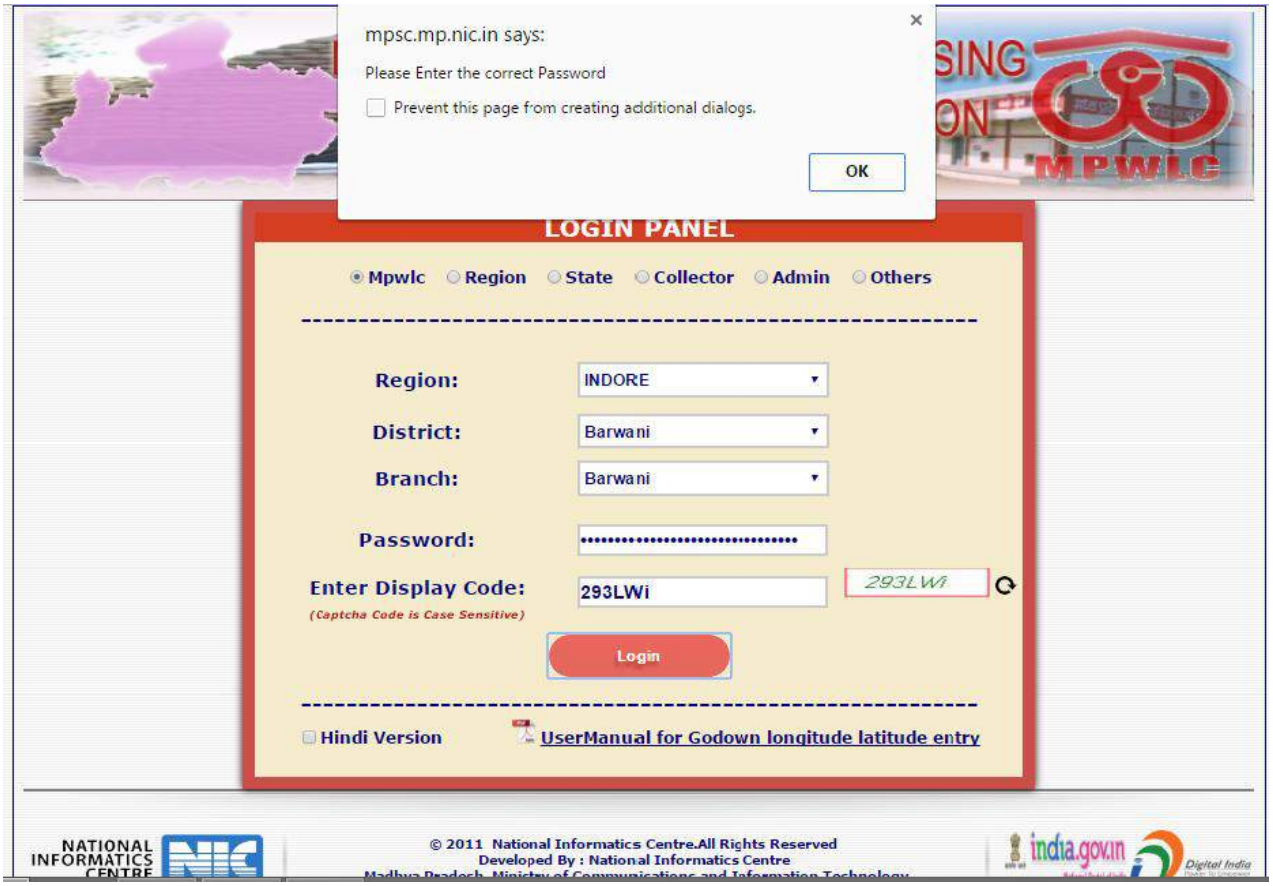
DO: Delivery Order

Login:

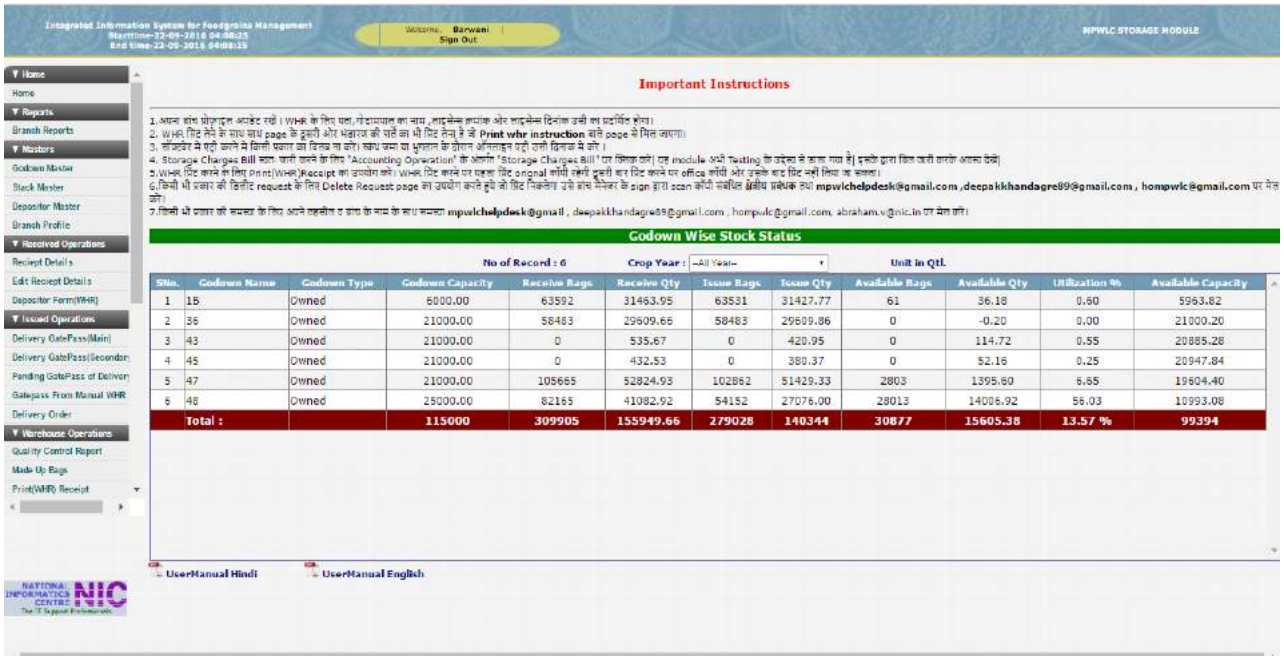
To use the benefits of the application enter the correct User Name , Password and Captcha and Click Login button as shown in the screen below:



Then system checks for the password. If password is incorrect then show the error message and returns to the same login window with the message "Please enter the correct Password."



If the password is correct then you can see the welcome page:

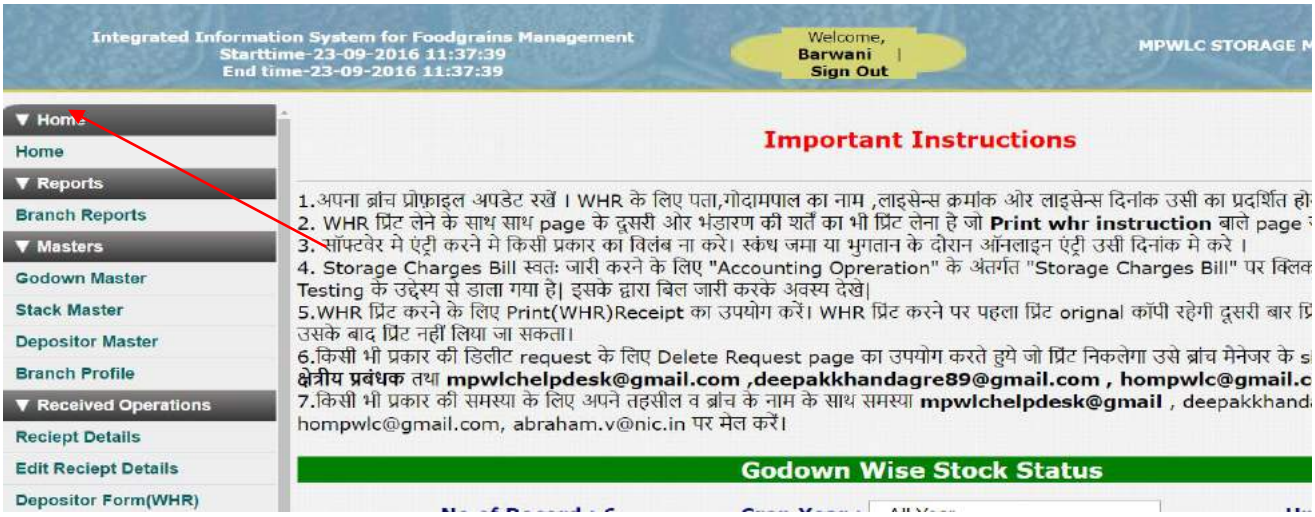


1. Home :

The purpose of **home** Manu is back to the home page or welcome page in software

1.1. Home:

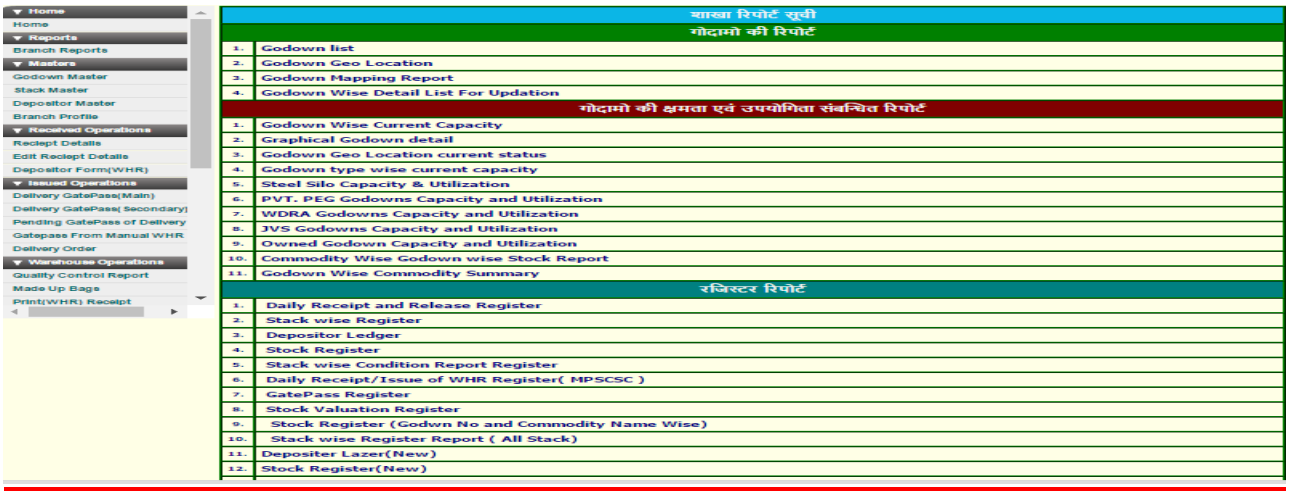
1. Click the **home** label and back to the initial state if any were in software.



2. Report :

2.1. Branch Report:

1. Purpose of Branch Report to monitor current working position of godowns and branch.
2. We can perform the following types of operation in branch report.
   a. Check out the current stock in godowns
   b. Check DO, Gatepass, WHR etc. status.
   c. Check capacity and utilization of godowns and also stacks in godowns
3. Many types of report are available.
4. Click the label and see the result.



Sample Reports:

1.

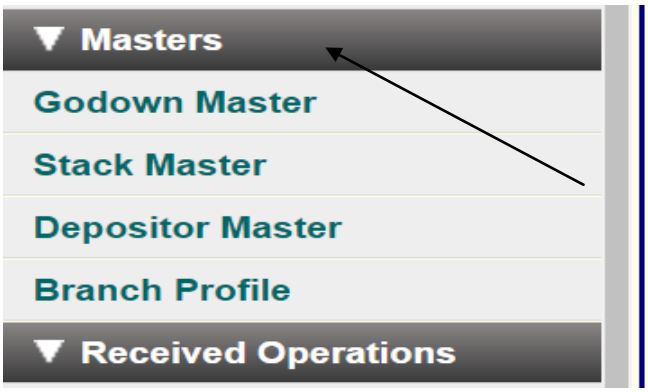
3. MASTERS

***There are in all Four Masters*-**

1. Godown Master,
2. Stack Master,
3. Depositor Master
4. Branch Profile (profile for Depot user and new addition facility for MPWLC)

The following screen is to all masters.



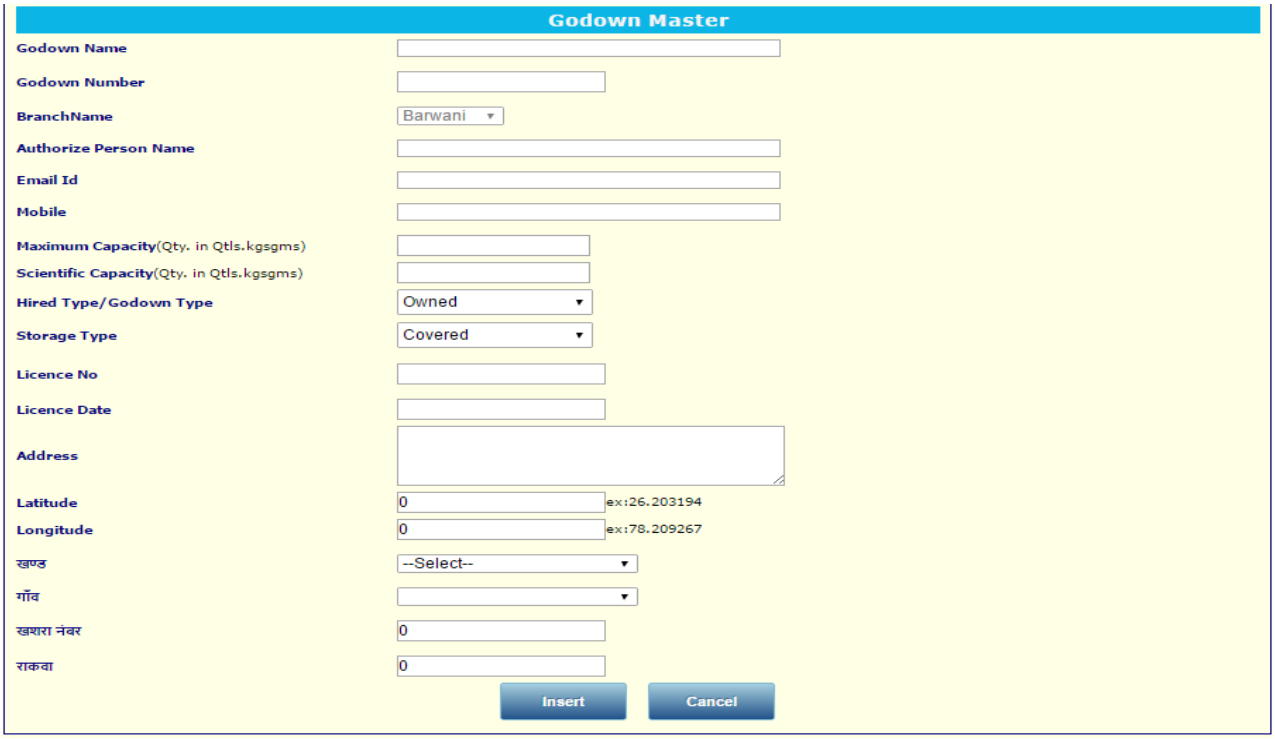
3.1. Godown Master

Purpose:

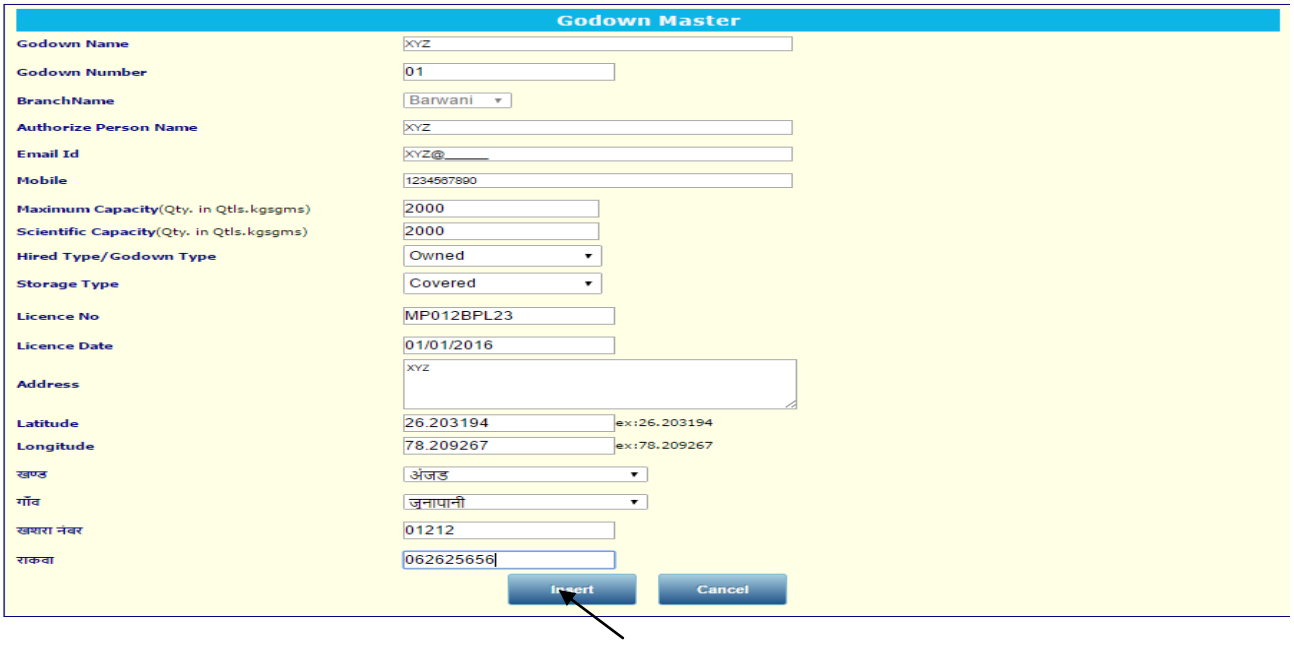
The Purpose of Godwon Masters is to maintain all the related records like Add new, update Existing one, delete of Godowns.

3.1.1. Adding new Godown

1. Click to the Add New Button to fill all your correct record like Godown name, capacity its Hired Type & Storage Type etc.



2. After entering all the relevant information click Insert Button (Your record successfully Save if no Error)



3. If error is occur then fill the correct information again and click insert button again.

3.1.2. Updating Godown:

1. For Updating the Godown information click Select link of the corresponding Godown name.

Godown Master

Total records are : 33 (Qty. in Qtls.kgsgms)

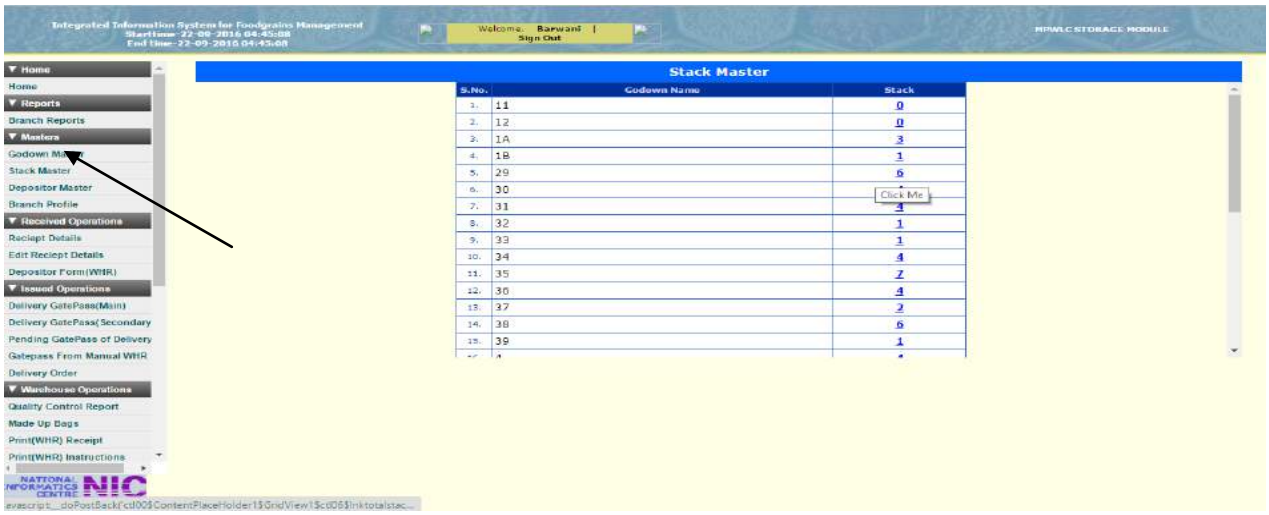
3.2. Stack Master:

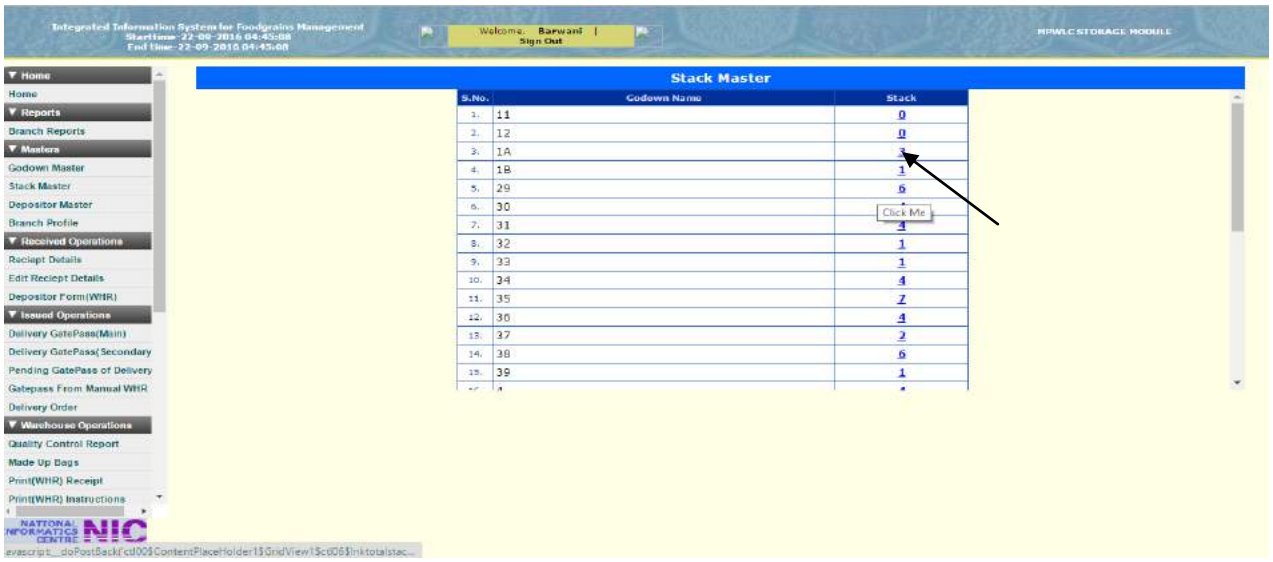
Purpose:

The Purpose of Stack Masters is to maintain all the related records like Add new, update existing one ,delete of Stack.

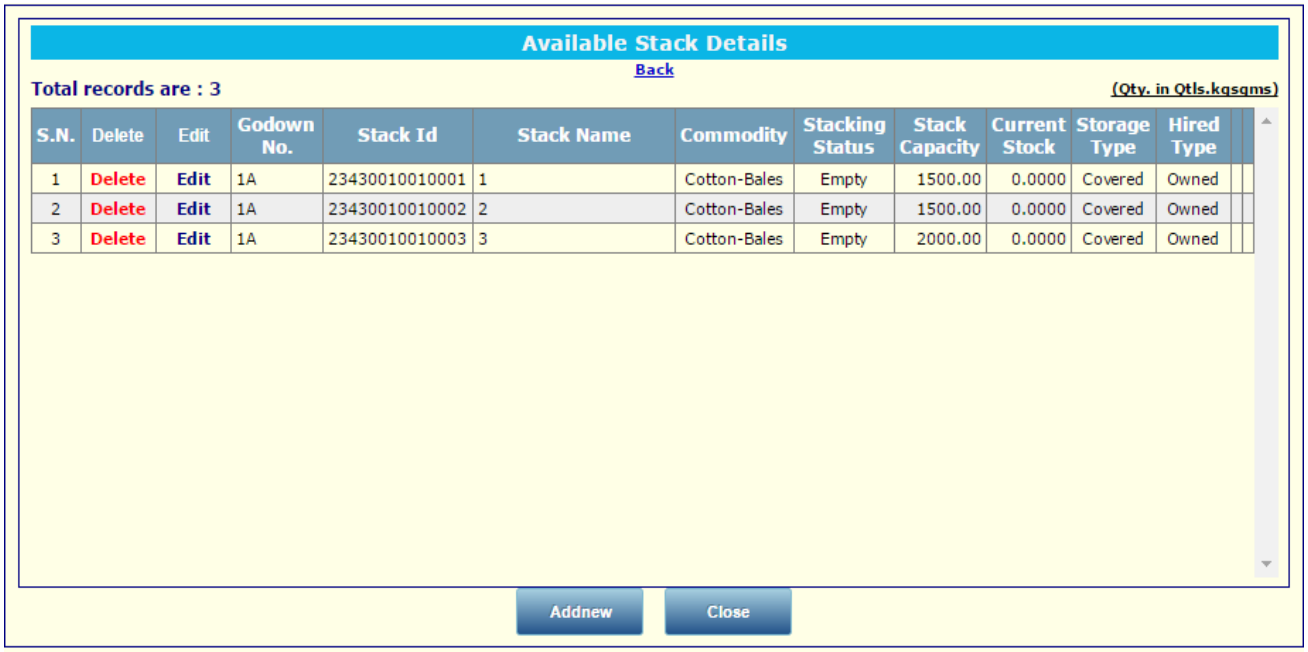


3.2.3. Adding new stack

1. For Adding a new stack in Godown click the no. of stack corresponding godown.

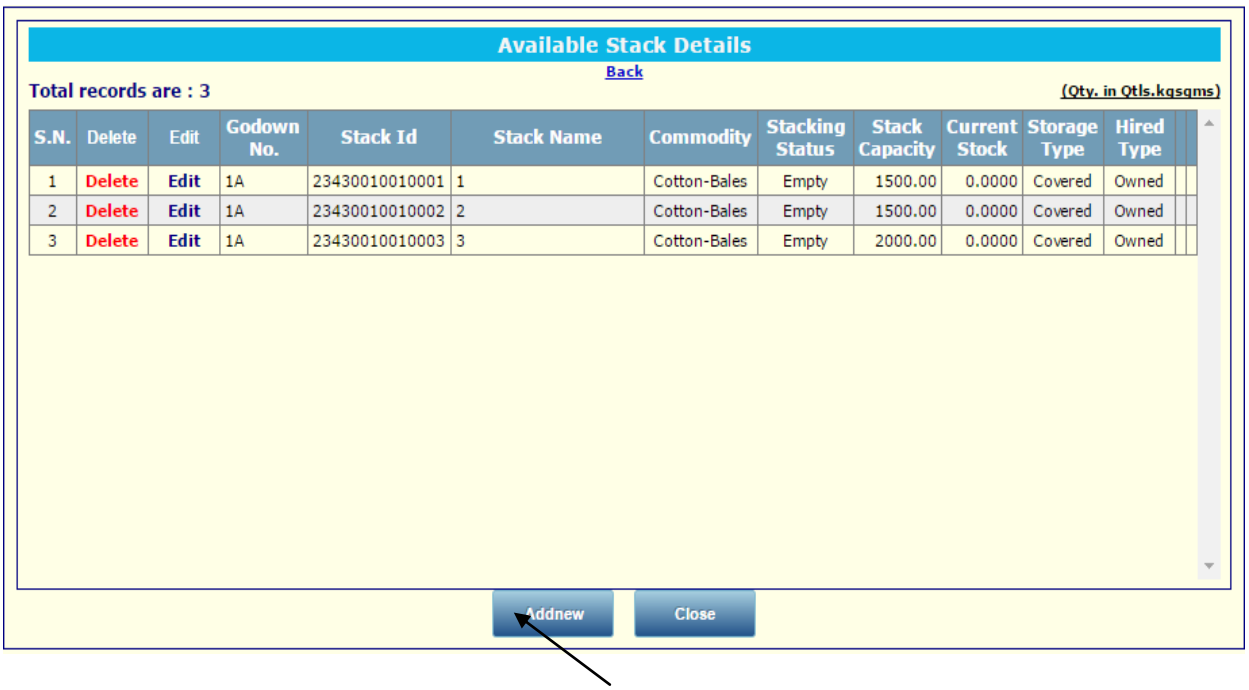


2. After click the label of no. of stack corresponding godown , new form is apear it show all stack detail,stack capacity ,stackID,Hiredtype etc. allready present in godown



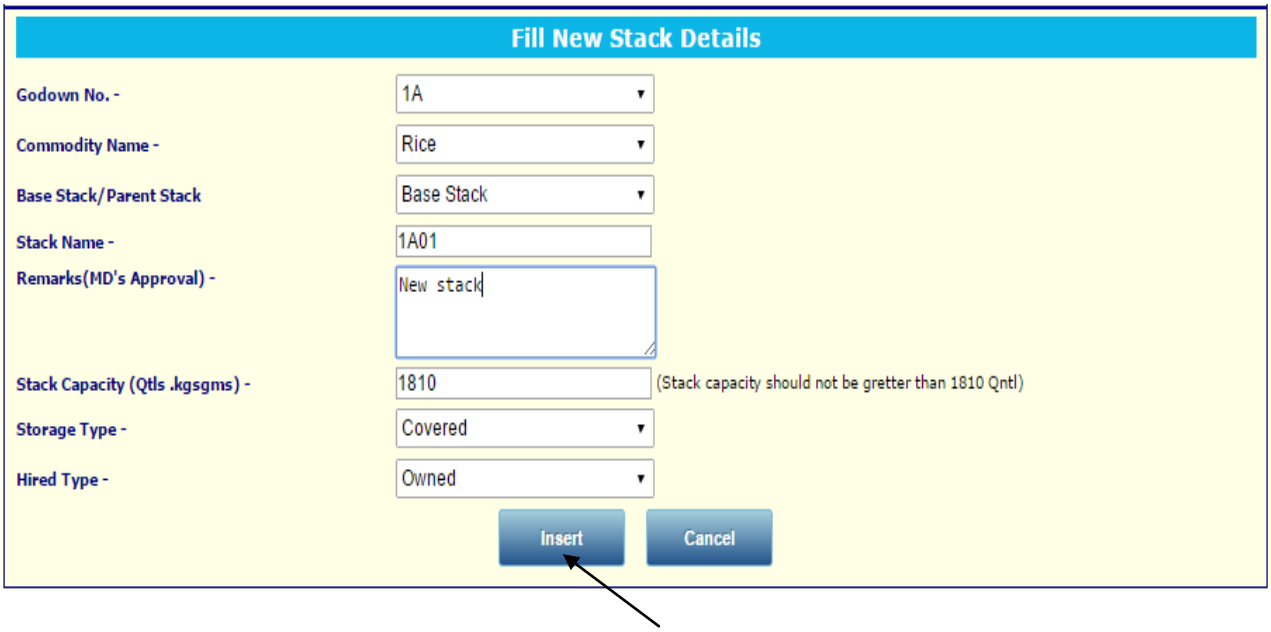
S.N.	Delete	Edit	Godown No.	Stack Id	Stack Name	Commodity	Stacking Status	Stack Capacity	Current Stock	Storage Type	Hired Type
1	Delete	Edit	1A	23430010010001	1	Cotton-Bales	Empty	1500.00	0.0000	Covered	Owned
2	Delete	Edit	1A	23430010010002	2	Cotton-Bales	Empty	1500.00	0.0000	Covered	Owned
3	Delete	Edit	1A	23430010010003	3	Cotton-Bales	Empty	2000.00	0.0000	Covered	Owned

3. Click addnew button to add new stack in godown



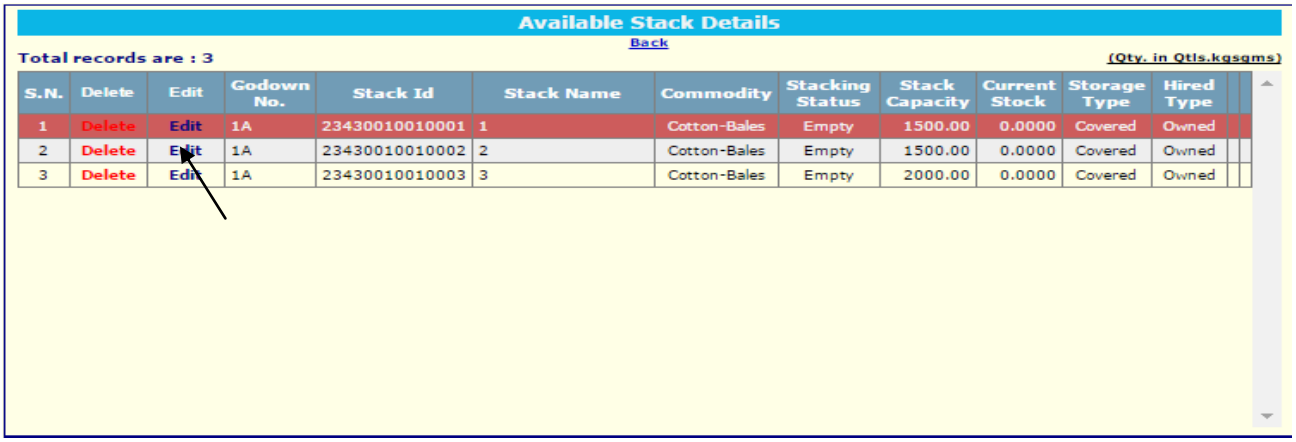
S.N.	Delete	Edit	Godown No.	Stack Id	Stack Name	Commodity	Stacking Status	Stack Capacity	Current Stock	Storage Type	Hired Type
1	Delete	Edit	1A	23430010010001	1	Cotton-Bales	Empty	1500.00	0.0000	Covered	Owned
2	Delete	Edit	1A	23430010010002	2	Cotton-Bales	Empty	1500.00	0.0000	Covered	Owned
3	Delete	Edit	1A	23430010010003	3	Cotton-Bales	Empty	2000.00	0.0000	Covered	Owned

4. Fill all the details of stack if you want to create it other wise click cancel.
5. If Stack Number/Name is already exists so enter other Stack Number/Name
6. After enter all the details then click Insert button.



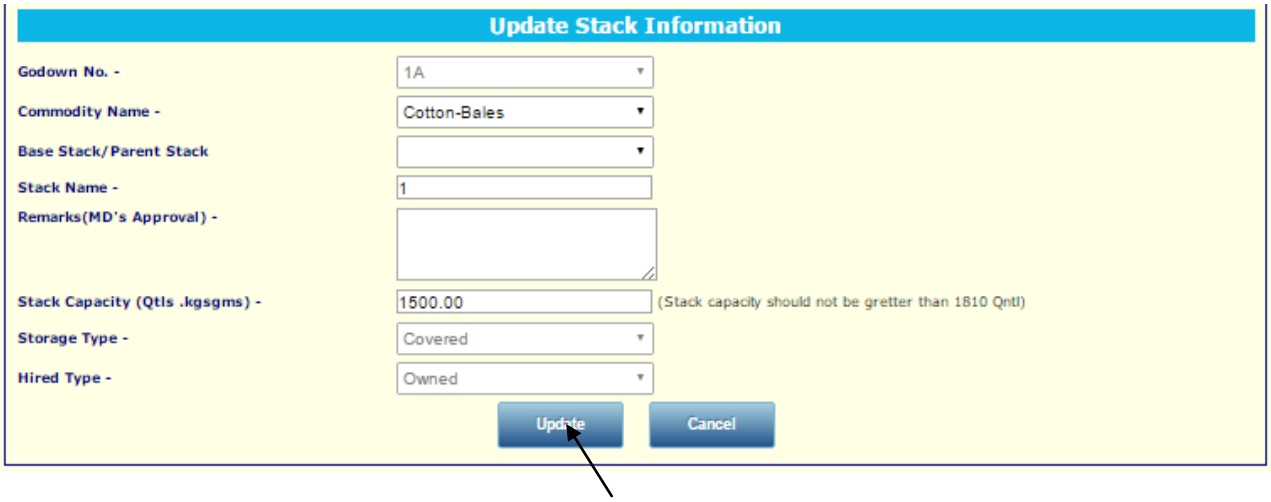
3.2.4. Updating Stack

1. For Updating the Stack information click Edit link of the corresponding Stack name.



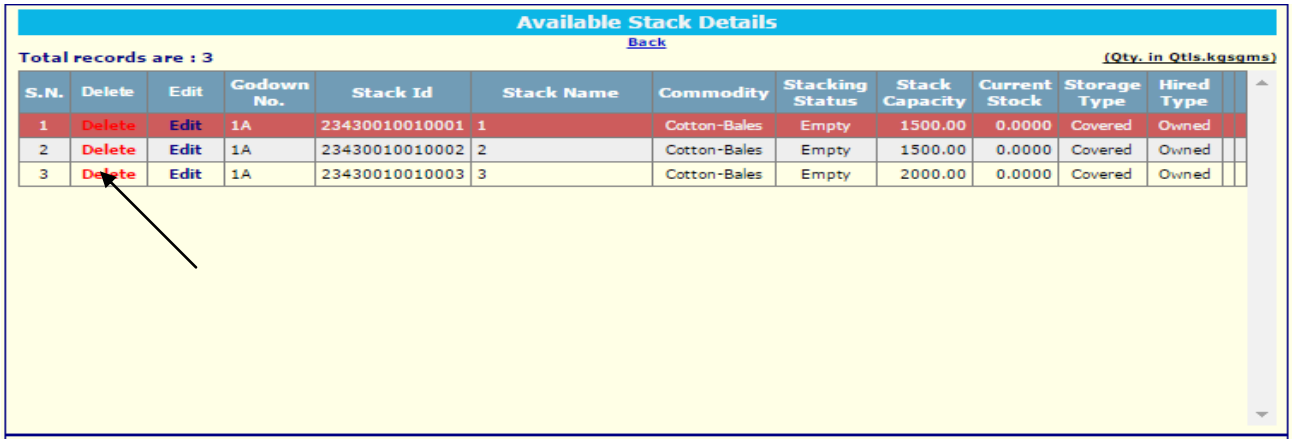
S.N.	Delete	Edit	Godown No.	Stack Id	Stack Name	Commodity	Stacking Status	Stack Capacity	Current Stock	Storage Type	Hired Type
1	Delete	Edit	1A	23430010010001	1	Cotton-Bales	Empty	1500.00	0.0000	Covered	Owned
2	Delete	Edit	1A	23430010010002	2	Cotton-Bales	Empty	1500.00	0.0000	Covered	Owned
3	Delete	Edit	1A	23430010010003	3	Cotton-Bales	Empty	2000.00	0.0000	Covered	Owned

2. Select the any record which existing one you want to update .
3. Click the update button to update it or if do not any changes then click cancel button.



3.2.5. Deleting Stack:

1. For deleting the existing record click the Delete Button corresponding Stack name and it will ask 'Are you sure want to delete the Record' Click ok If you want to delete record.
2. If you donot want to delete records click cancle button.



S.N.	Delete	Edit	Godown No.	Stack Id	Stack Name	Commodity	Stacking Status	Stack Capacity	Current Stock	Storage Type	Hired Type
